Rathes Sachchithananthan

(+44) 7990 724 598 · rathes.me · hello@rathes.me

EDUCATION

University Ulm | Ulm, Germany
B.Sc. Media Computer Science | 10/2011 - 09/2014

MAIN (TECH) STACK

TypeScript	VS Code
Next.js and Next Auth	Hyper
Tailwind CSS or Stitches	Netlify
Jest and Testing Library	Figma
MySQL on Planetscale	Notion
React Query or SWR	GitHub

ALTERNATIVE STACK

Laravel with PHP	Laravel Forge
PHPUnit or Pest	Digital Ocean

There are many other tools and services I use for deployment, monitoring and product management, but they all depend on the team and project I am working with and on

CAREER VISION

While I'm currently on the IC track as a full-stack engineer, my strength is my ability to understand and get all stakeholders on the same page, enabling my team to deliver effectively and efficiently.

In the long term, I see myself in a role that allows me to support and lead one or multiple teams to deliver impactful outcomes.

EXPERIENCE

Product Engineer 3 | Intercom
December 2021 - now

At Intercom, I'm learning how startups at a later stage operate and how engineers and individual teams contribute to a bigger picture.

Engineering Team Lead | Hussle
April 2021 - November 2021

As the team could not grow due to the impacts of the pandemic, I was guiding and leading the front-end and back-end engineers to collaborate and work closely together to help out each other to fill gaps.

Senior Front-End Engineer | Hussle
February 2020 - March 2021

In 2020, I made the decision to make another big step and moved to London to work in FitTech at Hussle. This was my chance to combine my passion for fitness with my passion for tech.

Software Engineer | Teamleader
May 2018 - January 2020

In summer 2018, I started a new chapter and joined Teamleader. This was not only a great opportunity for me to grow as a developer, but also a big new adventure as I moved from Germany to Belgium.

CEO | Aheenam
May 2016 - October 2021

In 2016, I decided decrease client work and focus more on creating software products. Therefore, I changed the type of my business and created a custom brand for this company.

Web Developer | netinsiders
November 2016 - April 2018

Co-Founder | KERNWERK
October 2015 - January 2018

Together with some friends, I created an awesome app for digital personal training. I created the backend of first MVP using Laravel as the framework of choice. Due to lack of time and shift of interests, I left this project by the end of 2017.

Production Assistant | Kopierland GmbH
June 2011 - March 2014

Web Designer | rathesDot/CreativeCreation
June 2006 - March 2016

Earning my first money creating custom MySpace layouts, I went on to create custom websites for various customer of different sizes as a freelancer.
